(54) Title: **ARTIFICIAL TURF**

(57) Abstract: An artificial turf filament has a cross-section that includes a central area and two wing areas integral with said central area. Further a bundle of a plurality of artificial turf filaments is proposed, wherein the artificial turf filaments are held together by one or more wrapping filaments wrapped around said artificial turf filaments. The wrapping filaments cross each other at cross points, and are bonded, preferably releasably bonded, to one another at said cross points. Also the wrapping filaments are bonded, preferably releasably bonded, to said artificial turf filaments.
